[www.karatcup.com](http://www.karatcup.com)

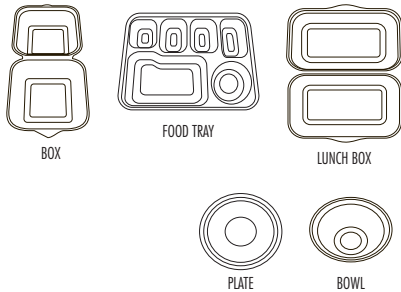

Bamboo is one of the fastest growing plants in the planet and it's no wonder why the earth conscious have started to look to Bamboo for eco-friendly choices.

Our compostable Bamboo Fiber Tableware is made from naturally grown renewable resources. Since the tableware is created from molded compressed bamboo fibers it develops a smooth finish which resembles paper in its appearance and feel but is microwave-safe, durable and waterproof.

Bamboo Fiber Tableware is capable of handling both hot and cold food, such as salad, fruit, french fries and hamburgers.

It is recommended to store Bamboo Fiber Tableware in a cool dry place.

Bamboo Fiber Tableware is fully compostable.
