

# PLA COLD CUP & LID

**Customize With Your Own Logo**  
**Order Minimum** 100 Cases  
**Lead Time** 10-12 Weeks  
 One Time Set-up Fee Applies

**Material** Clear Eco-Friendly PLA  
**Sizes** 3oz, 7oz, 8oz, 9oz, 10oz, 12oz, 16oz, 20oz, 24oz, 32oz  
**Designs** Clear, Stock Print or Custom Print  
**Matching Lids** Flat Lid, Dome Lid

Polylactic Acid or Polylactide (PLA) is a compostable polymer derived from 100% renewable resources. PLA, comparable to petroleum based plastic, is now used in a variety of industries including packaging, clothing, medicine and more. PLA is a nonvolatile and odorless polymer generally recognized as safe (GRAS) by FDA.

The life cycle of Karat® Earth PLA starts with starch rich plants such as corn, wheat and sugar beet. These plants are first milled to separate the starch, from which is unrefined dextrose is processed. The unrefined dextrose enters a fermentation process and the result is lactic acid.

After condensation, two lactic acid molecules convert into one lactide. The lactide molecule is then purified through vacuum distillation and a solvent-free melt causes the ring shaped molecule to turn into long chain polymers.

Our Karat® Earth PLA is fully compostable in commercial composting facilities. It can be converted back to monomer and polymer, or, it can be compostable into water, carbon dioxide and organic materials.

ITEM#	DESCRIPTION	RIM DIAMETER (MM)	CASE (PCS/CASE)	PALLET	GROSS WGT(LB)
KE - KC3	3oz Clear Eco-Friendly PLA Portion Cups	62	1,000	91	7.70
KE - KC7	7oz Clear Eco-Friendly PLA Cup (Custom Print Only)	74	2,000	TBA	21.16
KE - KC8	8oz Clear Eco-Friendly PLA Cups - <i>Coming Soon</i>	78	1,000	45	TBA
KE - KC9	9oz Clear Eco-Friendly PLA Cups	92	1,000	42	20.70
